NOTES
Capabilities available via normal network connectivity are available through VPN access. AFNet VPN use requires a government provided computer.
As additional capabilities become available for home or mobile use they will be advertised, and this matrix will be updated.
Please contact your local communications support for additional information on these capabilities and the services available through them.
*Please note that commercial capabilities are not supported by your Communications Squadron or endorsed in any way by the government; work directly with the resource's support team in these cases.
